HENRY FORD HEALTH Neurosciences

Think FAST for Stroke

Stroke is an emergency and time = brain, so it's important to seek emergency services. **If you suspect stroke, call 9-1-1 immediately.**

Facial droop on one side; ask the person to smile

Arm weakness or numbness on one side; ask the person to raise their arms **Speech** difficulty or slurring; ask the person to repeat a sentence

Time to call 9-1-1! Do not drive the patient, EMS can call ahead to the ED so the team is ready to treat you!

Why choose Henry Ford Health for stroke care? In a stroke emergency, having an experienced team with access to the latest treatment is critical. All 10 of our Emergency Departments have teams of highly trained stroke experts who provide rapid, life-saving stroke treatments. Learn more at henryford.com/stroke
